TRACK RECORDS
UNITED STATES CROP PRODUCTION

PREFACE

These track records of United States Crop Production were assembled to serve as a ready reference for data users. The track records are comprised of National level statistics for the principal crops in NASS' estimating program.

The following data, as applicable, are presented for each of the crops:

Historic estimates of acreage, yield, production, market year average price, and value.

Comparisons of preliminary and final planted and harvested acreage estimates.

Comparisons of production forecasts versus end-of-year and final production estimates.

Commodity estimates for 2003 to current are not considered final until the next historical revision, therefore, the columns titled '% of final' are a percent of the estimates published in the Annual Summary or the latest revision.

The crop estimating program reports on farmers' planting intentions, estimates of acreage actually planted and expected to be harvested, and forecasts of yield and production during the growing season. After the crops have been harvested, estimates of planted acreage, harvested acreage, yield, and production are made.

Through the mid-year and other quarterly probability surveys, information is collected on acreage, yield, production, and grain stocks on farms. Surveys conducted between quarters are used to gather information on crop conditions and yields.

1/ Due to program modification, dry peas and popcorn were removed starting in 1973.

2/ Planted Acres: Beginning in 1963 included: Planted for corn, sorghum, oats, barley, durum wheat, other spring wheat, rice, soybeans, flaxseed, peanuts, popcorn, cotton, dry beans, dry peas, potatoes, sweet potatoes, sugarbeets; also includes harvested acres for winter wheat, rye, hay, tobacco, and sugarcane - beginning in 1975; also includes sunflower seed.

3/ Harvested Acres: Corn, sorghum, oats, barley, wheat, rice, rye, soybeans, flaxseed, peanuts, popcorn, cotton, hay, dry beans, dry peas, potatoes, sweet potatoes, tobacco, sugarcane, and sugarbeets - beginning in 1975 also includes sunflower seed.

1/ New series.

2/ Crops included in area planted are corn, sorghum, oats, barley, winter wheat, rye, durum wheat, other spring wheat, rice, soybeans, peanuts, sunflower, cotton, dry edible beans, potatoes, canola, proso millet, and sugarbeets. Harvested acreage is used for all hay, tobacco, and sugarcane in computing total area planted. Includes double cropped acres and unharvested small grains planted as cover crop.

1/ Season average price, 1980-84. Marketing year average beginning 1985.
U.S. prices weighted by sales.

2/ 1982-84 values include allowances for loans outstanding and
government purchases, valued at the average loan and purchase
rate by states.

1/ Price and value exclude type 61 to avoid disclosure of individual operations.

2/ Price and value exclude type 41 to avoid disclosure of individual operations.

3/ Includes estimated value of production for CT and MA type 61 in 2007.

Used 2006 CT and MA type 61 price to compute the 2007 value of production.
